

HITCAP PROJECT DOCUMENTATION

3. Project Design Phase

Import Data using Transform Maps (Spreadsheet)

The project design defines the data structure, staging process, field mapping, duplicate-handling mechanism, reporting structure, and dashboard required for the solution.

Custom Table Design

- Target table: Employee Test.
- Table name: u_employee_test.
- Purpose: Store the transformed employee records in ServiceNow.
- Import Set table: Employee Import.
- Purpose: Act as the staging area for spreadsheet data before transformation.
- Transform Map name: Sample Spreadsheet Import.
- Source Table: Employee Import; Target Table: Employee Test.
- Field mapping is performed using Auto Map Matching Fields and Mapping Assist.
- Employee ID is used for Coalesce to identify the same employee during repeated imports.
- Reports: Employees by Department, Employees by Location, and Employee List Report.
- Employee Analytics Dashboard contains the three reports.
