

HITCAP PROJECT DOCUMENTATION

5. Project Development Phase

Import Data using Transform Maps (Spreadsheet)

The development phase implements the designed solution in ServiceNow.

Spreadsheet Development

- Prepare the employee spreadsheet with Employee ID, Employee Name, Email, Department, and Location.
- Download the spreadsheet in Microsoft Excel (.xlsx) format.
- Create the Employee Test table with the required employee fields.
- Use Load Data to create the Employee Import table and upload the Excel file.
- Create the Sample Spreadsheet Import Transform Map.
- Select Employee Import as Source Table and Employee Test as Target Table.
- Use Auto Map Matching Fields and Mapping Assist to configure field mappings.
- Run the transform and verify the success status.
- Configure Coalesce and import additional data containing existing and new Employee IDs.
- Verify that existing records are updated and new Employee IDs are inserted.
- Create Employees by Department, Employees by Location, and Employee List Report.
- Create Employee Analytics Dashboard and add all three reports.
